

Predict Class using both KNN and Naïve Bayes

Instruction to execute the code:

This program is associated with two text files

- training.txt
- testing.txt

These files contain the data given by the instructor and two CSV files that were converted from the two Text files.

The above mentioned CSV files are, ○

train.csv

- test.csv

Download all the above mentioned file.

Run knn_modified.py (the code) in python IDLE.

The code is designed to predict Class using both KNN and Naïve Bayes.
